THE PENNSYLVANIA STATE DATA CENTER PROGRAM

THE CONCEPT

The Pennsylvania State Data Center (PSDC) Program has been established to improve access to and use of statistical resources available from the United States Bureau of the Census and other sources. Census Bureau products that can be accessed through this PSDC Program include all major statistical programs covering such areas as: population, housing, agriculture, manufacturing, retail and wholesale trade, governments, etc. Data are generated in printed reports, microfiche, and computer files. Information and services are available through the PSDC office at The Pennsylvania State University/Capitol Campus, the Pennsylvania State Library, or through the network of Affiliate Data Centers (ADCs) located across the Commonwealth.

THE PENNSYLVANIA STATE DATA CENTER

Data Products and Services

The PSDC located at The Pennsylvania State University/Capitol Campus will provide products and services to any interested user. State agencies, local governments, businesses, nonprofit organizations, or researchers may all obtain information housed and generated by the PSDC. Costs incurred by the PSDC in providing products and services will be charged to the user.

Training and Information

The PSDC facilitates education and training in the use of statistical resources by participating in conferences, workshops, and training courses throughout the state. The PSDC also publishes a periodic newsletter about user services and new statistical products.

If you would like information about training sessions or would like to receive copies of the newsletter please contact the Pennsylvania State Data Center.

Products and services available through the PSDC are:

- Census Bureau printed reports and microfiche
- Census Bureau reference maps
- PSDC printed reports
- Consultation on data availability and use
- Computer tape processing
- Demographic and geographic profiles
- Statistical analyses
- Statistical mapping and geoprocessing

The Center

The PSDC staff is prepared to assist you in meeting your data and information needs. The center is open daily from 8:30 a.m. to 4:30 p.m. For information, please contact:

Introduction

The Pennsylvania Counties: 1980 Census Data Atlas contains selected socio-economic data from the 1980 Census of Population and Housing. The geographic areas for which data are presented are: Pennsylvania and its 67 counties.

The statistics presented in this report represent only a fraction of the data that is available from the 1980 Census. Data that are included, however, represent the Census items that are most frequently requested from the Pennsylvania State Data Center.

Through the use of statistical maps and tables this report provides the user with a "snapshot" of the Commonwealth in 1980. It enables the comparison and analysis of local jurisdictions to individual counties and the Commonwealth.

The data presented in this publication were taken from the Census Bureau's Summary Tape File 3. This file was derived from the 1980 Census sample questionnaire. These data are estimates of the actual figures that would have resulted from a complete count. A complete explanation of 1980 Census data is provided in the 1980 Census of Population and Housing: User's Guide. This publication is available from the U.S. Government Printing Office at $5.50 per copy. The GPO stock number is 003-024-03625-8. Copies are available for review at the PSDC or Affiliate Data Centers.

Organization of the Atlas

The Pennsylvania Counties: 1980 Census Data Atlas is divided into two main sections.

The first section is comprised of selected statistical maps of Pennsylvania by county. Each map uses shading patterns to depict a county's numerical value for a particular characteristic; with darker shading patterns representing higher values. Each shading pattern represents one-fifth of the counties. The table on pages 2 and 3 provides the exact values for each characteristic.

The second section includes a data profile of selected 1980 Census characteristics for Pennsylvania and individual counties. Each profile contains 1980 Census sample counts, as well as certain derived variables and percentage calculations.
